18. Lightbox Plus

Lightbox Plus permits users to view larger versions of images, simple slide shows, videos and content all in an overlay.

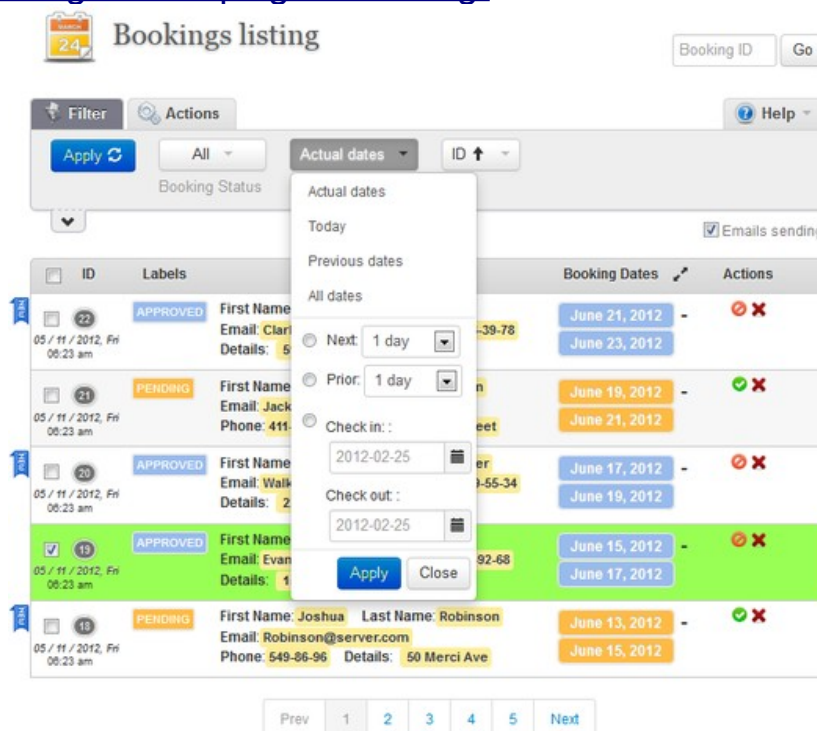

<http://wordpress.org/extend/plugins/lightbox-plus/>

19. Booking Calendar

Its a plugin for online reservation and availability checking service for your site.

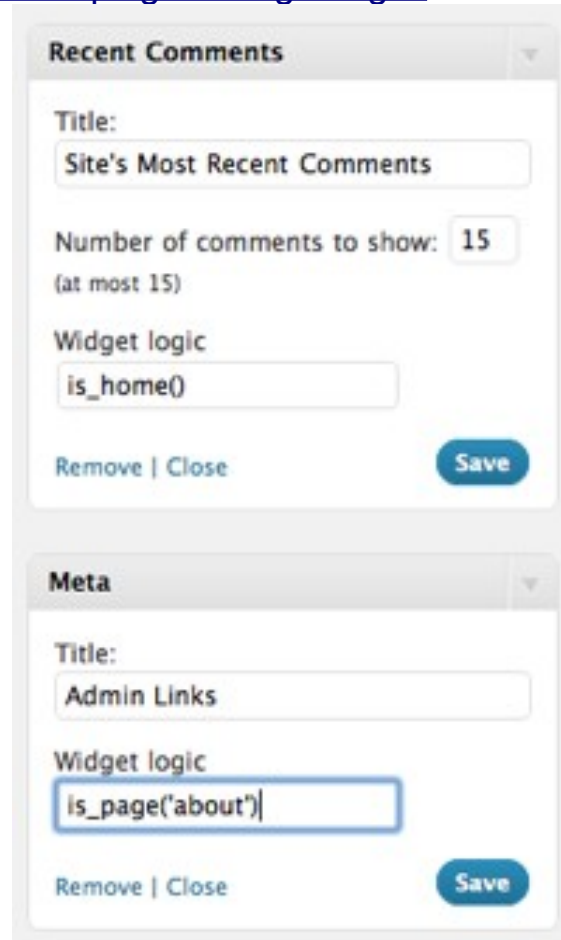

<http://wordpress.org/extend/plugins/booking/>

20. Widget Logic

Widget Logic lets you control on which pages widgets appear using WP's conditional tags. It also adds a 'widget_content' filter.

<http://wordpress.org/extend/plugins/widget-logic/>

The screenshot displays two widget configuration panels. The top panel is titled 'Recent Comments' and contains the following fields: 'Title' with the value 'Site's Most Recent Comments', 'Number of comments to show' set to '15' (with a note '(at most 15)'), and 'Widget logic' set to 'is_home()'. The bottom panel is titled 'Meta' and contains: 'Title' with the value 'Admin Links', and 'Widget logic' set to 'is_page('about')'. Both panels have 'Remove | Close' and 'Save' buttons.

21. Theme My Login

Changes your normal WP login page to another page on your site that you can configure yourself.

<http://wordpress.org/extend/plugins/theme-my-login/>

22. Visitor Maps and Who's Online

Displays Visitor Maps with location pins, city, and country. Includes a Who's Online Sidebar. Has an admin dashboard to view visitor details.

<http://wordpress.org/extend/plugins/visitor-maps/>

The screenshot shows a WordPress blog post titled "Pacific County to Test All Hazard Alert Broadcast Sirens October 15 and October 22, 2008". The post content includes a paragraph about a siren test and a photo of a siren tower. A red arrow labeled "Sidebar Widget" points to the right sidebar, which contains a "Who's Online" widget showing 18 visitors online (17 guests, 1 member) and a "Meta" section with links to Site Admin, Log out, Entries RSS, Comments RSS, and WordPress.org.

23. WP-PostRatings

The best Post Ratings plugins online, and it's free. Adds an AJAX rating system for your WordPress blog's post/page.

<http://wordpress.org/extend/plugins/wp-postratings/>

This Is An Announcement

Posted by GaMerZ at 17:33 in [WP-Sticky](#), [Testing](#) - Announcement

Testing WP-Sticky's Announcement Feature

Want to know what is the difference between Announcement Posts and Sticky Posts? Check it out [here](#).

DO NOT POST support questions in the comments, please use <http://forums.lesterchan.net> instead.

BUT before you do that, please make sure you have read the **plugins online readme** and **NOTE** the tabs at the top. That is the exact same readme.html that is included in the zip file of each plugin.

24. Sidebar Login

Easily add an ajax-enhanced login widget to your site's sidebar.

<http://wordpress.org/extend/plugins/sidebar-login/>

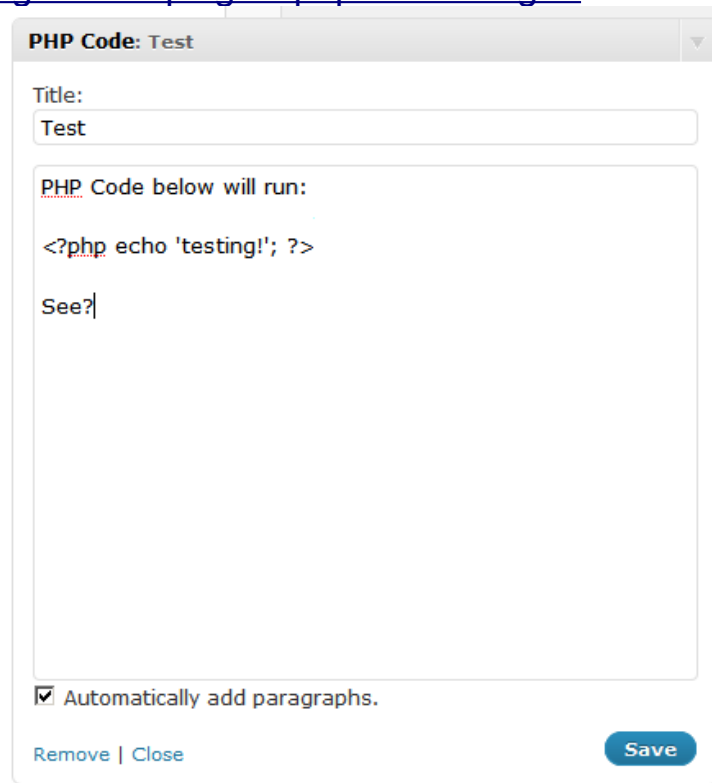

The image shows a login widget titled "Login". It contains a "Username:" label followed by a text input field, and a "Password:" label followed by a text input field. Below these fields is a checkbox labeled "Remember me". At the bottom of the widget is a "Login »" button, and below that are two links: "» Register" and "» Lost your password?".

25. PHP Code Widget

Like the Text widget, but also allows working PHP code to be inserted.

<http://wordpress.org/extend/plugins/php-code-widget/>

The image shows a configuration window for a "PHP Code" widget. The title bar says "PHP Code: Test". Inside, there is a "Title:" label with a text input field containing the word "Test". Below this is a large text area containing the text "PHP Code below will run:" followed by a code block:

```
<?php echo 'testing!'; ?>
```

 and the text "See?". At the bottom of the window, there is a checkbox labeled "Automatically add paragraphs." which is checked. In the bottom right corner, there is a "Save" button. In the bottom left corner, there are links for "Remove" and "Close".

26. Peter's Login Redirect

Redirect users to different locations after logging in and logging out.

<http://wordpress.org/extend/plugins/peters-login-redirect/>

30. Quick Chat

Self hosted WordPress chat plugin supporting private chat, chat rooms, avatars, user list, words filtering, smilies, caching plugins and more.

<http://wordpress.org/extend/plugins/quick-chat/>

The screenshot shows the Quick Chat plugin interface on a WordPress site. The header features the site name "TechyTalk.info" with the tagline "Powered by Linux" and a navigation menu with links: Home, WordPress Plugins, PHP & SQL Projects, Ubuntu PPAs, About Me, and Contact Me. A search bar is located on the right. The main chat area is titled "Quick Chat" and shows a chat log for "March 6th, 2012". The chat log includes messages from "Guest_279", "Marko", "Guest_869", and "Guest_167". Each message has a "Translate" link. The chat area also includes a "Ban Transcript" section with a text input field containing "Marko" and a language dropdown set to "English". A "Send" button is at the bottom of the chat area. The right sidebar contains a "Quick Count" section showing 40 users online, 1 administrator (Marko), and 39 visitors. Below this is a "Recent Posts" section with a list of posts, and a "Recent Comments" section with a list of comments. The footer of the chat area says "Powered by Quick Chat".

38. WP SlimStat

A powerful real-time web analytics plugin for WordPress.

<http://wordpress.org/extend/plugins/wp-slimstat/>

39. Custom Field Template

This plugin extends the functionality of custom fields.

<http://wordpress.org/extend/plugins/custom-field-template/>

The screenshot shows the 'カスタムフィールドテンプレート' (Custom Field Template) interface. It features a form for a 'Plan' with the title 'Where are you going to go?'. The form includes several sections:

- Favorite Fruits:** A list of fruits with checkboxes: apple, orange (checked), banana, and grape (checked).
- Miles Walked:** A radio button selection for 'Weekend' (selected), with options 0-9, 10-19, and 20+.
- Temper Level:** A dropdown menu set to 'Low'.
- Hidden Thought:** A text input field with a '切り替え' (Switch) button.

At the bottom, there is a text input field containing 'パス: p' and a rich text editor toolbar with various formatting options.

40. Custom Post Type UI

Admin UI for creating custom post types and custom taxonomies in WordPress

<http://wordpress.org/extend/plugins/custom-post-type-ui/>

The screenshot shows the 'Manage Custom Post Types' interface. At the top, there's a title 'Manage Custom Post Types' with a plug icon. Below it, a message states: 'Deleting custom post types does **NOT** delete any content added to those post types. You can easily recreate your post t'. A table lists the custom post types. The table has columns: Action, Name, Label, Public, Show UI, Hierarchical, Rewrite, and Rewrite Slug. The first row shows 'movies' with a label 'Movies', public, show UI, not hierarchical, and rewrite slug 'movies'. Below the table, there's a note: 'Place the below code in your themes functions.php file to manually create this custom post type. This is a **BETA** feature. Please [report bugs](#).' A code block contains the following PHP code:

```
register_post_type('movies', array( 'label' => 'Movies','description' => "",'public' => true,'show_ui' => true,'show_in_menu' => 'tools.php','capability_type' => 'post','hierarchical' => false,'rewrite' => array('slug' => "'),'query_var' => true,'has_archive' => true,'supports' => array('title','editor','excerpt','trackbacks','custom-fields','comments','revisions','thumbnail','author','page-attributes'),'labels' => array ( 'name' => 'Movies',
```

41. SyntaxHighlighter Evolved

Easily post syntax-highlighted code to your site without having to modify the code at all. As seen on WordPress.com.

<http://wordpress.org/extend/plugins/syntaxhighlighter/>

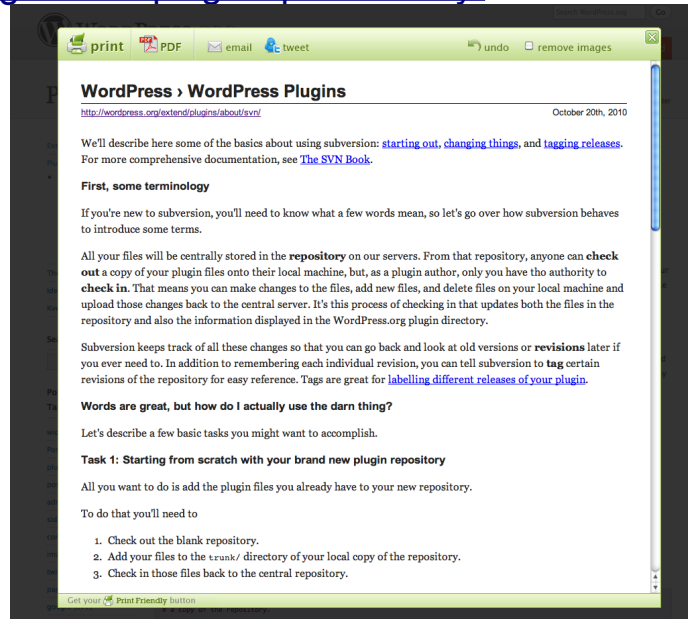

The screenshot shows a code editor with syntax-highlighted HTML and PHP code. The code is as follows:

```
01. <!DOCTYPE html PUBLIC "-//W3C//DTD XHTML 1

47. Vidlinkr

The easy way to start earning money from video content. Coull Vidlinkr turns every YouTube video on your website into a revenue stream within minutes.

<http://wordpress.org/extend/plugins/vidlinkr/>

48. Wordfence Security

Wordfence Security is a free enterprise class security plugin that includes a firewall, virus scanning, real-time traffic with geolocation and more.

<http://wordpress.org/extend/plugins/wordfence/>

The screenshot shows the Wordfence Security plugin interface. On the left is a sidebar with navigation links: Dashboard, Posts, Media, Links, Pages, Comments, Appearance, Plugins, Users, Tools, Settings, VaultPress, and Wordfence. The Wordfence section is expanded, showing options for Scan, Live Traffic, Blocked IPs, and Options. The main content area is titled 'Wordfence Scan' and features a 'Wordfence Activity Log' message: 'Blocking fake Googlebot at IP 62.75.248.138'. Below this are two tabs: 'Summary' and 'Activity Log'. The 'Summary' tab is active, displaying an 'Activity Summary' and a 'Wordfence is Protecting:' table. The 'Activity Summary' states that the most recent scan completed 35 minutes ago and that a scan is not running at this time, with the next scan scheduled for approximately 24 minutes from now. It also congratulates the user for having no security issues. The 'Wordfence is Protecting:' table lists various site statistics. Below the summary is a 'Start a Wordfence Scan' button. At the bottom, there are tabs for 'New Issues' and 'Ignored Issues'. The 'New Issues' tab is active, showing a message: 'Congratulations! You have no security issues on your site.'

3,606 Files	1,266 Comments
515 Directories	85 Categories

10 Themes	277.71 MB of data in 3,606 files
4 Pages	36 Database Tables
424 Posts	84,057 Database Rows

49. Front-end Editor

Edit content inline, without going to the admin area.

<http://wordpress.org/extend/plugins/front-end-editor/>

The screenshot shows the Front-end Editor plugin interface. At the top, there is a 'Format' tab and an 'Insert' tab. Below these are various formatting options: Bold (B), Italic (I), Strikethrough (S), Subscript (x₂), Superscript (x²), Bulleted List, Numbered List, Link, and Unlink. There are also style selection buttons for Paragraph, Heading 1, Heading 2, and Heading 3. Below the formatting options is a text area with the text 'WYSIWYG'. To the left of the text area is a 'Save' button and a 'Cancel' button. The text area contains the following text: 'Before the adoption of WYSIWYG techniques, text appeared in edi standard typeface and style with little indication of layout (margin required to enter special non-printing *control codes* (now referred t indicate that some text should be in boldface, italics, or a different

50. P3 (Plugin Performance Profiler)

See which plugins are slowing down your site. This plugin creates a performance report for your site.

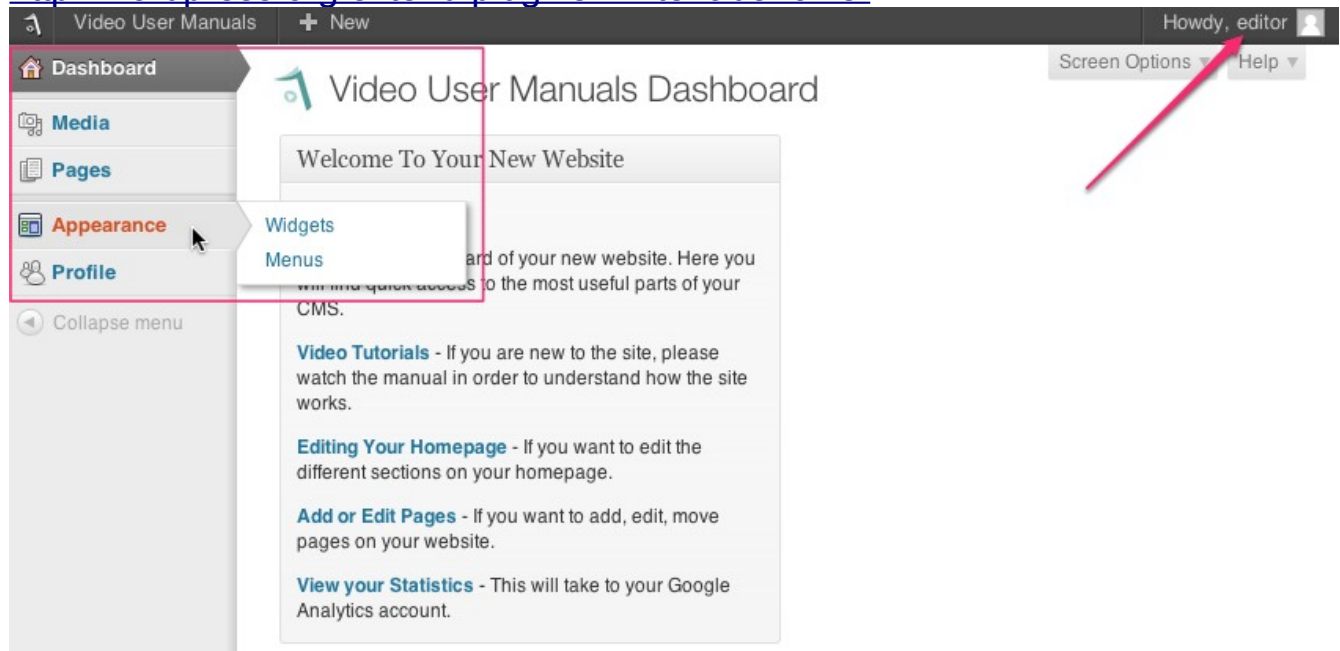

<http://wordpress.org/extend/plugins/p3-profiler/>

51. White Label CMS

Version: 1.5.1 Allows complete customization of dashboard panels and logos, removal of menus, giving editors access to widgets and menus plus lots more.

<http://wordpress.org/extend/plugins/white-label-cms/>

52. Faster Image Insert

Fully integrates media manager into editing interface, avoid reloading thickbox pop-up, with enhanced features like multi-insert & mass-editing.

<http://wordpress.org/extend/plugins/faster-image-insert/>

The screenshot shows the 'Faster Insert' plugin interface. At the top, there are tabs for 'From Computer', 'From URL', 'Gallery (2)', and 'Media Library'. Below the tabs, there are links for 'All Tabs: Show', 'Sort Order: Ascending | Descending | Clear'. The main area is a table with columns 'Media', 'Order', and 'Actions'. It lists two files: 'FILE0626' and 'FILE0632', each with a 'Show' link. Below the table are buttons for 'Save all changes', 'Insert selected images', and 'Invert selection'. Underneath is a 'Mass Image Edit' section with input fields for 'Image Titles', 'Image Alt-Texts', and 'Image Captions'. There are also radio buttons for 'Image Alignment' (None, Left, Center, Right) and 'Image Sizes' (Thumbnail, Medium, Large, Full size).

53. User Meta

WordPress user management plugin. Custom user profile, registration with extra fields. Custom Login, Import users from csv and many more.

<http://wordpress.org/extend/plugins/user-meta/>

The screenshot shows the 'User Meta' plugin interface. On the left, there is a list of fields with their IDs: Username (ID:1), Email (ID:2), Password (ID:3), Website (ID:4), Display Name (ID:5), Nickname (ID:6), First Name (ID:7), Last Name (ID:8), Avatar (ID:15), and Country (ID:16). The 'Country' field is expanded, showing its configuration: Field Title (Country), Field Type (Text), Title Position (Top), Meta Key (country), Field Description, Default Value, CSS Class, Field Size (e.g. 200px), Max Char, and CSS Style. On the right, there are sections for 'WordPress Default Fields' (Username, Email, Password, Website, Display Name, Nickname, First Name, Last Name, Biographical Info, Registration Date, Role, Jabber, AIM, YIM, Avatar) and 'Extra Fields' (Text, Paragraph, Rich Text, Hidden Field, Drop Down, Checkbox, Select One (radio), Date / Time, Password, Email, File Upload, Image URL, Phone Number, Number, Website, Country). At the bottom, there are sections for 'Formatting Fields' (Page Heading, Section Heading, HTML, Captcha) and '3 steps to getting started' (Shortcode).

54. Wordpress Backup to Dropbox

Keep your valuable WordPress website, its media and database backed up to Dropbox in minutes with this sleek, easy to use plugin.

<http://wordpress.org/extend/plugins/wordpress-backup-to-dropbox/>
